# PROJECTS

## HIGH MILEAGE HEROES - KWIKFIT

<https://highmileageheroes.co.uk/>

High Mileage Heroes is a testament to my skills and experience as a developer. I built this application from scratch, using ReactJS and best practices to create a user-friendly and reliable tool that meets the needs of both customers and the company. I took a collaborative approach to development, working closely with stakeholders to ensure that the application was tailored to their specific requirements and goals. From ideation to deployment, I was involved in every stage of the process, bringing my expertise in web development and design to deliver a high-quality product that exceeded expectations.

High Mileage Heroes is a web application designed to help customers save money and extend the lifespan of their car tyres. By choosing the best tyre match. With this innovative tool, customers can easily find and compare different types of tyres for their vehicle, discover potential savings and get a better understanding of each brand wear rates. The application is backed by a team of experienced professionals who are dedicated to providing top-notch service and support to their customers. By using High Mileage Heroes, customers can rest assured that they are making the best possible choice for their vehicle, their budget, and their safety on the road.

## SOFTUNI REACT EXAM APP

<https://github.com/stoine92/softuni-react-exam>
